

AQUA-CLEAR

Water-Based Topcoat

Len-Tex Aqua-Clear Topcoat 3.0

Originally developed in 1994, Len-Tex introduced a proprietary formulation from a blend of urethane, acrylic, and vinyl polymers to seal the surface of its wall covering.

The result was Aqua-Clear, a water-based, Teflon-free top coat with exceptional resistance to abrasion and staining.

The most recent formulation, Aqua-Clear 3.0, was revamped and formulated as an ultra-low emitting, water based protective top coat with **enhanced product features such as:**

- Improved abrasion resistance
- Excellent resistance to common staining agents
- Scrubability with commercial cleaners, including bleach when diluted in water
- Non-yellowing surface
