

# CHEVRON PATTERN - WALNUT FC RANDOM PLANKS (FACE MATCHING)

Approximately 36" W x 40" H

A chevron pattern is a decorative design consisting of two diagonal lines that intersect at a 45-degree angle to form a V or inverted V-shape. It is created using a series of adjacent rectangles cut from multiple flitches, with diagonal widths that align. Each repeated segment of the pattern measures 18" in width.
